

TCT07060

Pressure tank

- Made of stainless steel (SUS304)
- Most suitable for low viscosity liquid
- Light weight
- Tank capacity: 10L and 20L
- Purpose: Liquid container for pneumatic dispenser.

Types and sizes

Standard types

- TL 10(10L) ϕ 230mm x 378mm(H)
- TL 20(20L) ϕ 230mm x 563H
- Bore for material picking up and pressure supply is PT 1/4"

With liquid level sensor

- TL10S(10L) ϕ 230mm x 378mm(H)
- TL20S(20L) ϕ 230mm x 563mm(H)
- Bore for material picking up and pressure supply is PT1/4"
- Contact configuration: a contact lower limit (liquid level 2~3L): ON
- Contact volume: 50VA DC/AC
- Max open and close voltage: 300DC/AC
- Max open and close power current: 0.5A DC/AC

Option	Assorted option
Regulator & meter gauge	Manual quantitative valve
Ball valve	Automatic quantitative valve
Air hose ϕ 4mm x ϕ 6mm	Needle spray gun
Material hose PE4mm ϕ x 6mm ϕ	Analog controller
Connectors	Digital controller
